Our Core Activities

BASCORP Group operates across four interconnected activities: **investment, business building, strategic partnerships, and portfolio management**. Together, these activities define how we identify opportunities, deploy capital, support businesses, and create long-term value.

- **Investment** — We identify and invest in businesses, assets, and opportunities with strong fundamentals, attractive growth prospects, and strategic relevance. Our investment approach is selective and disciplined, with capital allocated on the basis of opportunity, risk, quality, and long-term potential.

- **Business Building & Development** — We work with businesses to strengthen, develop, and scale their operations. Beyond capital, we contribute strategic direction, commercial expertise, market access, and relationships to help businesses capture opportunities and achieve sustainable growth.

- **Strategic Partnerships** — We build long-term relationships with entrepreneurs, investors, businesses, and institutions where complementary capabilities, resources, and networks can create mutual value. Our partnerships are designed around alignment, trust, and shared long-term objectives.

- **Portfolio Management** — We actively oversee and develop our investments throughout their lifecycle. This includes strategic oversight, performance monitoring, risk management, governance, capital allocation, and support for key business decisions.

How We Create Value

BASCORP combines **capital with capability**. We do not view investment as a purely financial transaction; where appropriate, we take an active and constructive role in helping businesses become stronger, more resilient, and better positioned for growth.

Our role may range from investor and strategic partner to long-term owner, depending on the opportunity and the needs of the business. Across each role, we bring disciplined capital allocation, governance, strategic perspective, commercial relationships, and a long-term commitment to value creation.

Our objective is clear: to identify quality opportunities, strengthen the businesses in which we invest, and build enduring value for our partners, portfolio companies, and stakeholders.
